## Jet Streaming Data and Predictive Analytics:

How the Lakehouse and Apache Spark™  
Enable Collins Aerospace to Keep Aircraft  
Flying

**Sanket Amin**

Senior Manager, CAS Data Science and Analytics

and delayed

My Flight to a  
Bucket List  
Destination  
Was Delayed...

**5 Times** in a  
Single Day

# Why did my Flight Get Delayed?

- Air Carrier Delay
- National Aviation System
- Extreme Weather
- Security Issue

10:10 AM	E54	Cancelled
8:59 AM	C28	Delayed 9:30 AM
8:30 AM	E50	Delayed 9:30 AM
8:35 AM	E48	Delayed 9:30 AM
8:00 AM	B18	Delayed 8:30 AM
8:31 AM	E58	Cancelled
8:35 AM	A8	Delayed 9:30 AM
9:25 AM	E46	Cancelled
6:00 AM	A8	Delayed 9:30 AM
6:59 AM	C27	Delayed 9:30 AM

# Why did my Flight Get Delayed?

- Air Carrier Delay
- National Aviation System
- Extreme Weather
- Security Issue

## Causes of Delays

Airlines struggling with pandemic trigger rising share of flight delays

✈ Air Carrier    ⚡ Severe Weather    🛫 National Aviation System    🛡 Security

Source: Transportation Department's Bureau of Transportation Statistics  
Flights that arrived late due to previous delays not included; 2022 is through April; BTS began collecting data in June 2003

Bloomberg

Cost to Large US Airline Operator

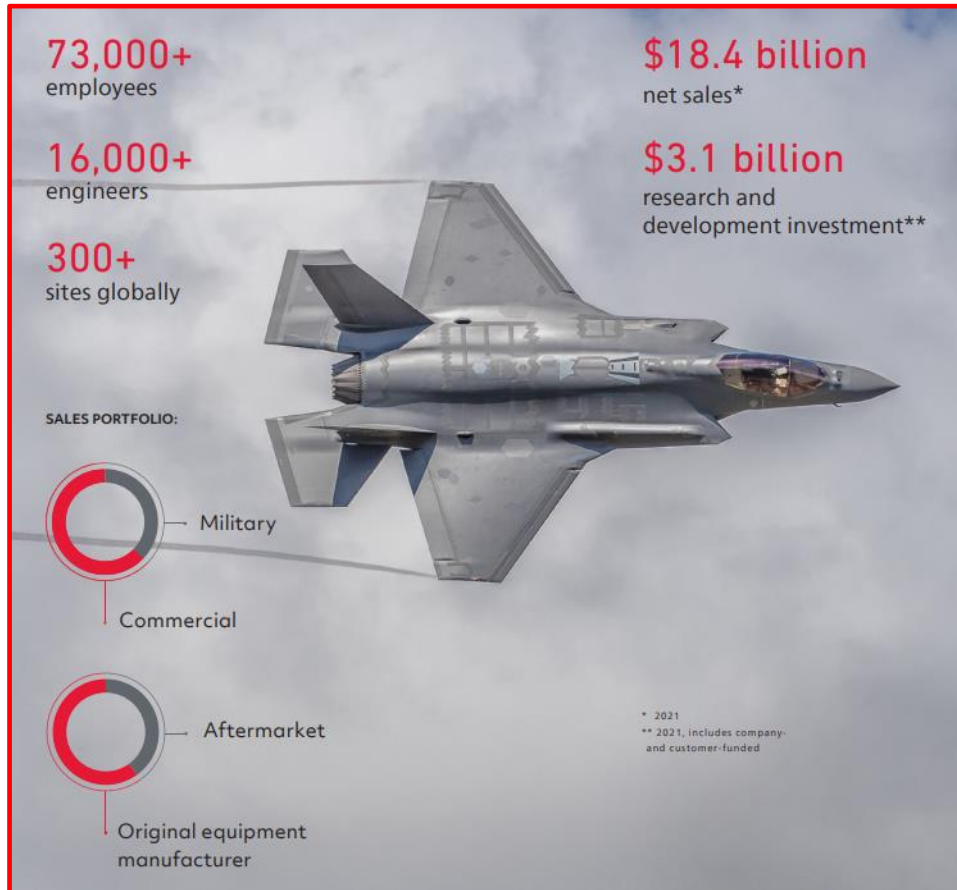

~\$8M/Month

# Who is Collins Aerospace?

RTX

By the numbers....

## COLLINS AEROSPACE COMMERCIAL CONTENT

Look Left Look Right Look Up Look Down  
Collins Aerospace is There

## CAS.. is Leading the Digital Transformation in Aerospace

### CONNECTED AVIATION SOLUTIONS

Based in Annapolis, Maryland

- Airport systems
- Applications, analytics & data products
- Business aviation flight support services
- Connectivity & network services

**Aviation connects the world. We connect aviation.**

# CAS is Leading the Digital Transformation in Aerospace

## End to End Digital Technology Landscape

***Aviation connects the world. We connect aviation.***

## CONNECTED AVIATION SOLUTIONS

*Based in Annapolis, Maryland*

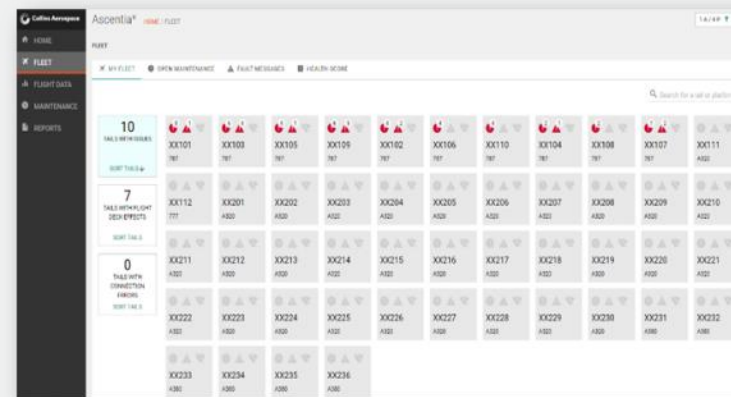

- Airport systems
- Applications, analytics & data products
- Business aviation flight support services
- Connectivity & network services

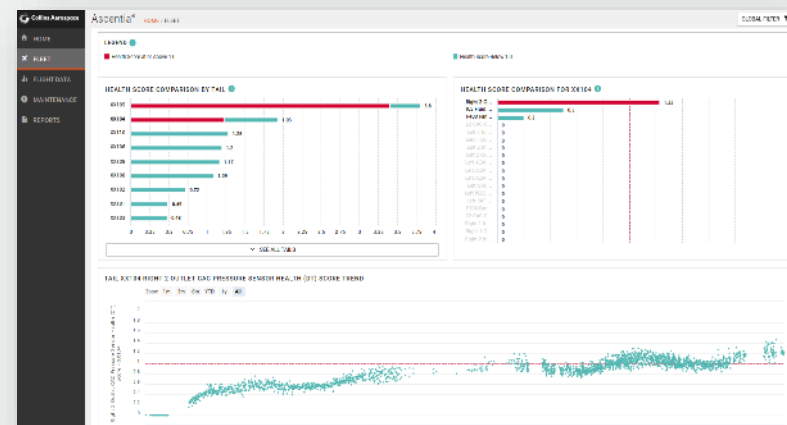

- Monitor fleet health and issues requiring attention
- Drill into issues by looking into specific parameters
- View Mx recommendations
- Set thresholds on specific parameters via custom alerts

### Fleet Overview

- Fleet health – Fault Codes, PHM Alerts
- Issues requiring attention
- Drill down to aircraft issue details

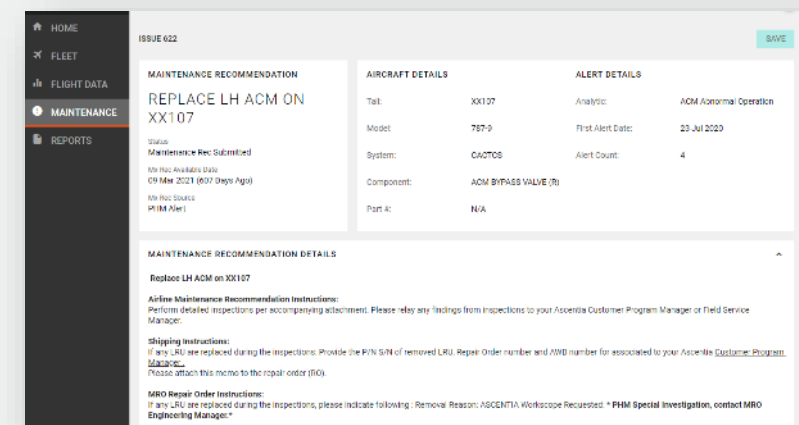

### Fleet Health Score & Analytics

- Develop your own analytics
- Filter by flight phase and apply statistical aggregations
- Monitor your fleet

### Data Visualization & Analysis

- Aircraft full flight & snapshot data plotting
- Maintenance & fault timelines
- Custom alerts

### Maintenance Recommendations

- Aircraft issue documentation
- Prognostic notifications
- Issue life cycle tracking
- Direct communication with Ascentia team

# How We Learned To Develop and Deploy Predictive Analytics

# The Early Days

Trying to fly with what we had.

**Circa 2017- 2018**

# The Early Days

Trying to fly with what we had.

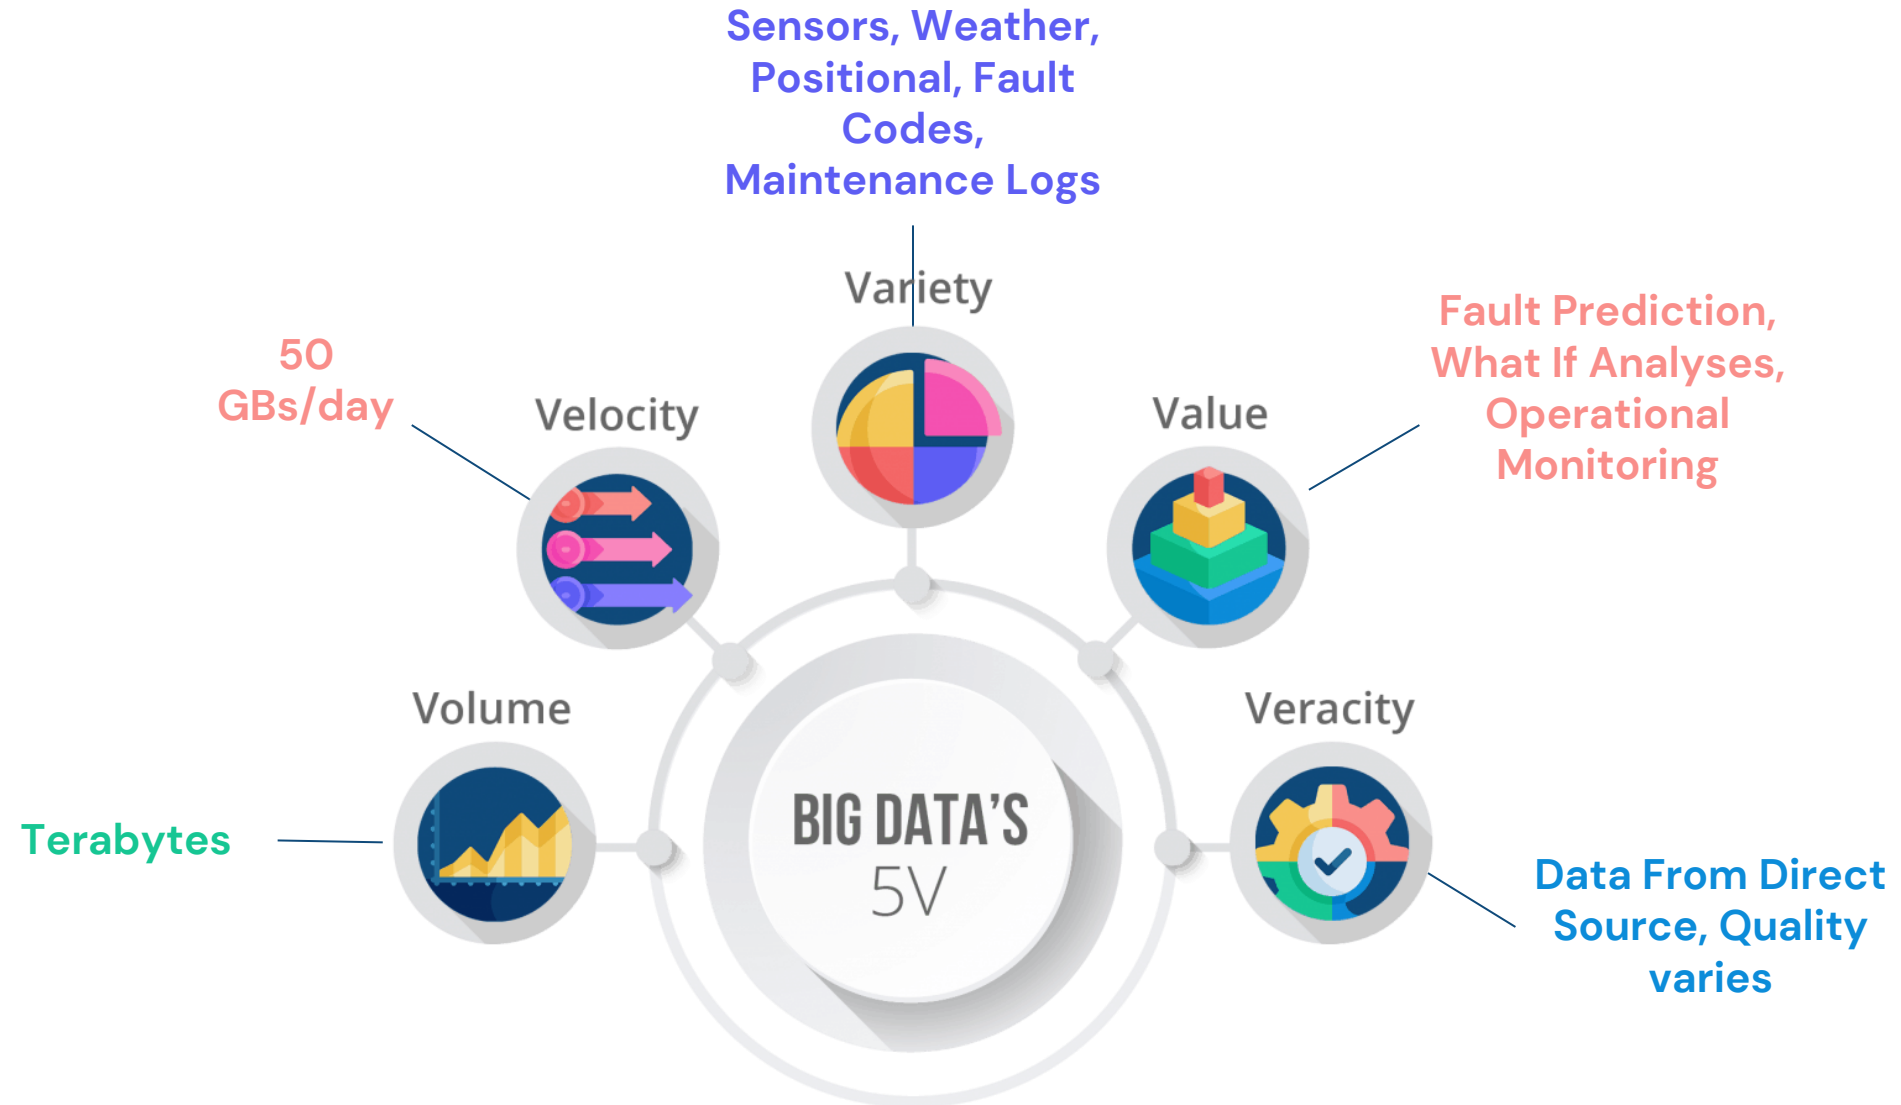

- Ingestion
- Data Preparation
- Analysis
- Presentation

- Compute power limited to individual corporate issued laptops.
- 30 Mins to Process 1 Month of Data From Two Aircraft
- **We needed Scalability for Big Data and Rapid Prototyping**

# Big Data Is In The Air

# Our Wright Brothers Moment

When We Began to Rapidly Prototype Analytics

**Dec 2019**

# Our Wright Brothers Moment

## When We Began to Rapidly Prototype Analytics

- The first organization within Collins and RTX to use Databricks
- Notebooks and Python naturally enabled Data Scientists to analyze data
- Easy adoption of parallel computing on big datasets due to Apache Spark integration
- Aircraft data stored in as delta tables in the Data Lake introduced additional efficiency

# We saved cost while going faster

- A home-grown scouting tool for finding potential analytics for Ascentia
- 168,000 Features Produced Per Flight

## BEFORE

Cycles (tail + quarter): **3,741**

Total Cost~ **\$13,929.30**

Total Time~ **105.53 hr.**

# We saved cost while going faster

- Leveraged Notebook widgets with Azure Data Factory for dynamic meta-data driven orchestration
- Implemented more efficient Spark processing techniques
- Optimization of delta tables.

Optimize

```
1  display(spark.sql(f"""
2
3  OPTIMIZE anser.dash_{customer}_{body}_signature_features_new_schema
4
5  """))
```

THEN Partition

```
3  (signature_features
4  .write
5  .mode("overwrite")
6  .partitionBy('key', 'tailNumber')
7  .option("overwriteSchema", "true")
8  .saveAsTable(f"anser.dash_{customer}_{body}_signature_features_new_schema"))
```

## BEFORE

Cycles (tail + quarter): **3,741**

Total Cost~ **\$2,880.90**

Total Time~ **21.83 hr.**

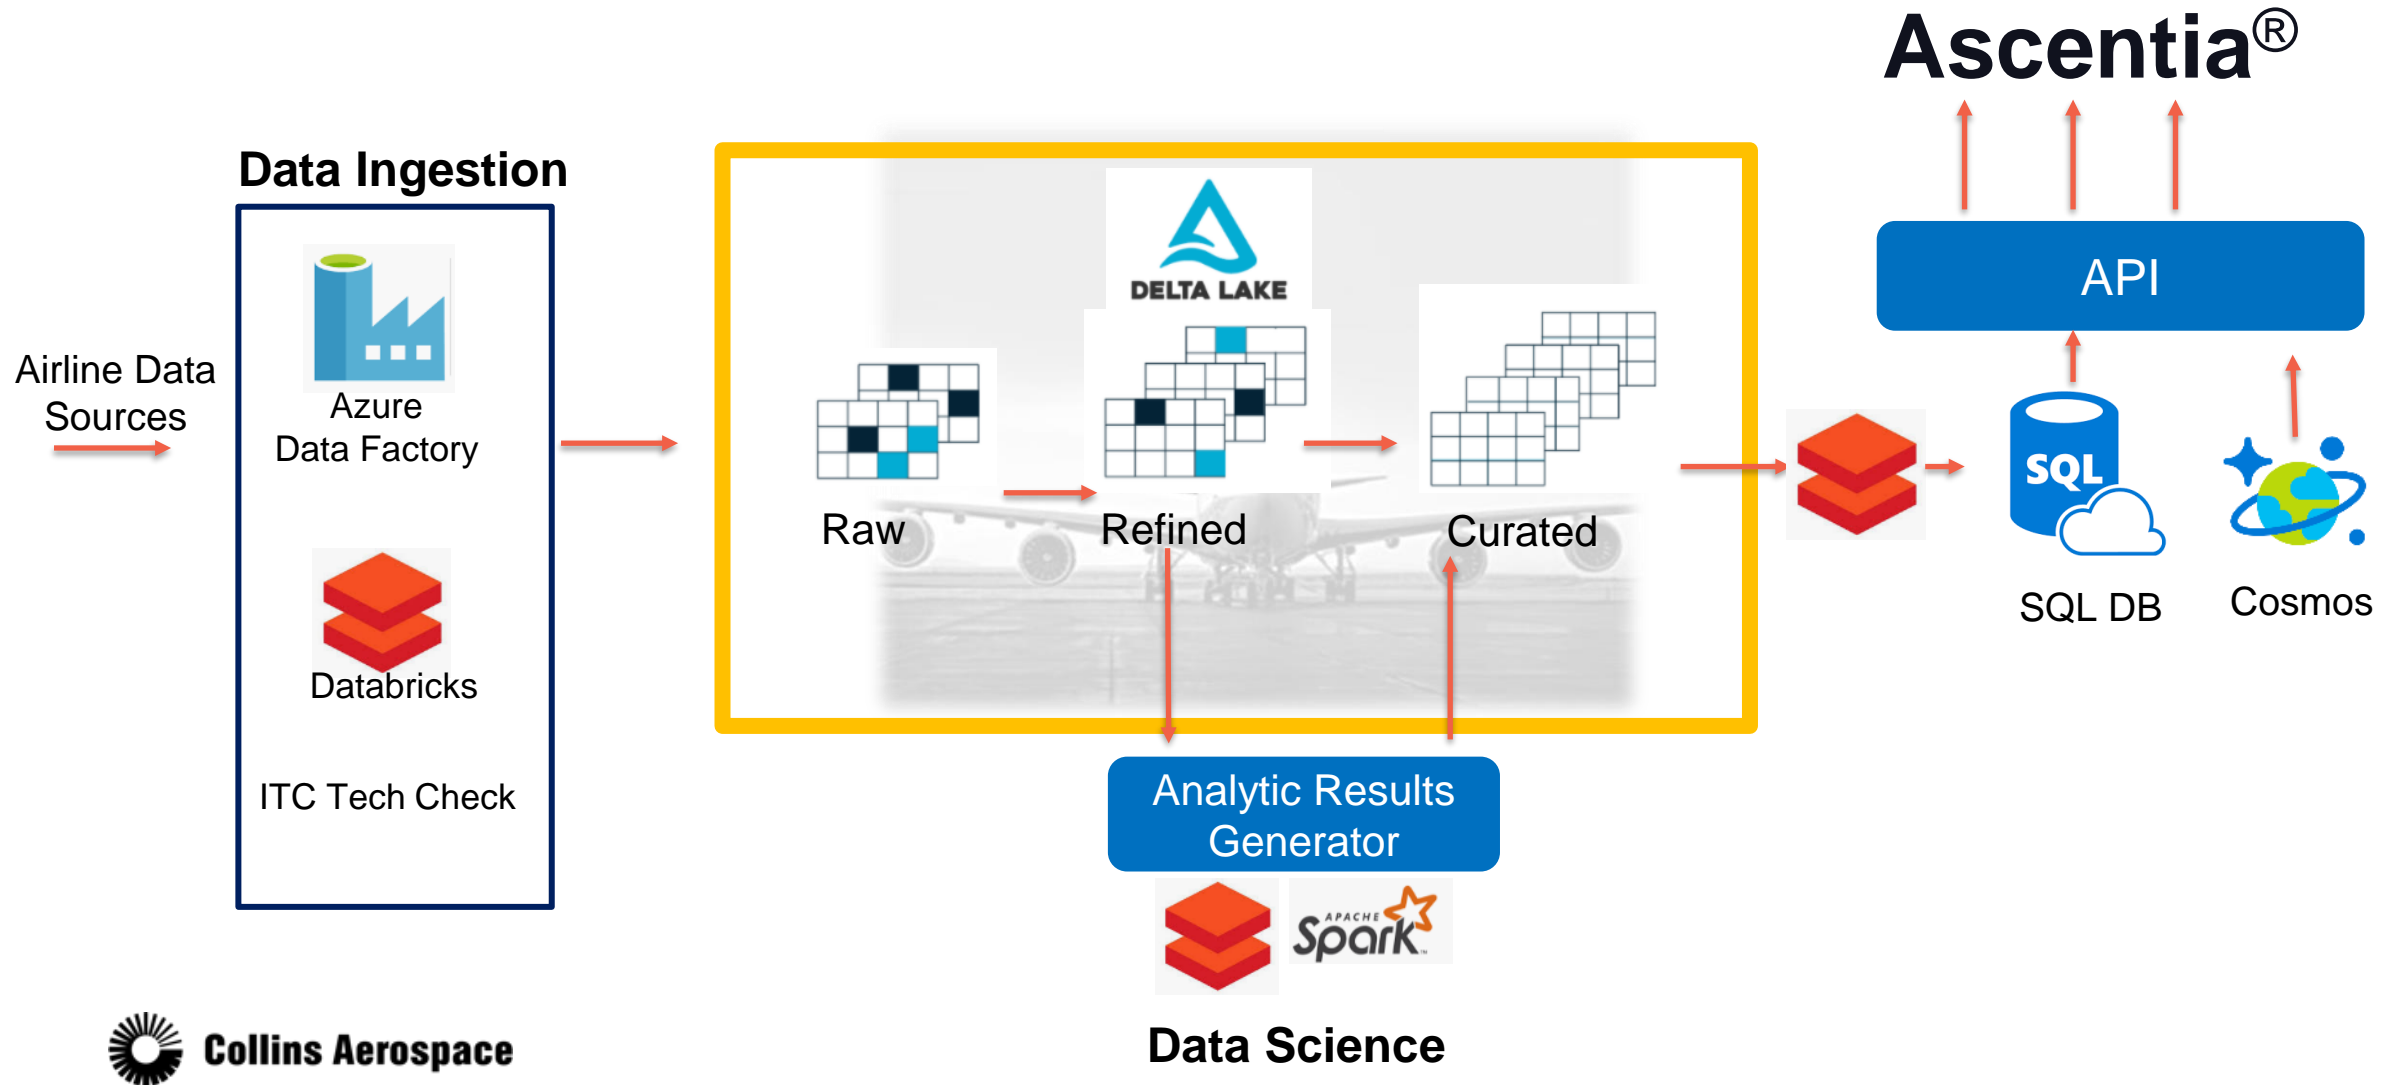

# The Jumbo Jet Era

When We Began to Rapidly Deploy Analytics

**2022 - Current**

# The Jumbo Jet Era

# Where We **Departed** vs Where We **Are**

- 2 Aircraft
- 7GB's of Data
- 0 Analytics

- 80 Aircraft
- 7.5 TB's of Data
- 12 Analytics

- 768 Aircraft
- 300 TB's of Data
- 55 Analytics

**~30%**  
decrease in  
potential delays

**~20%**  
decrease in unplanned  
maintenance

# Where We Are **Headed**

Continue adoption of platform solutions to reach new heights

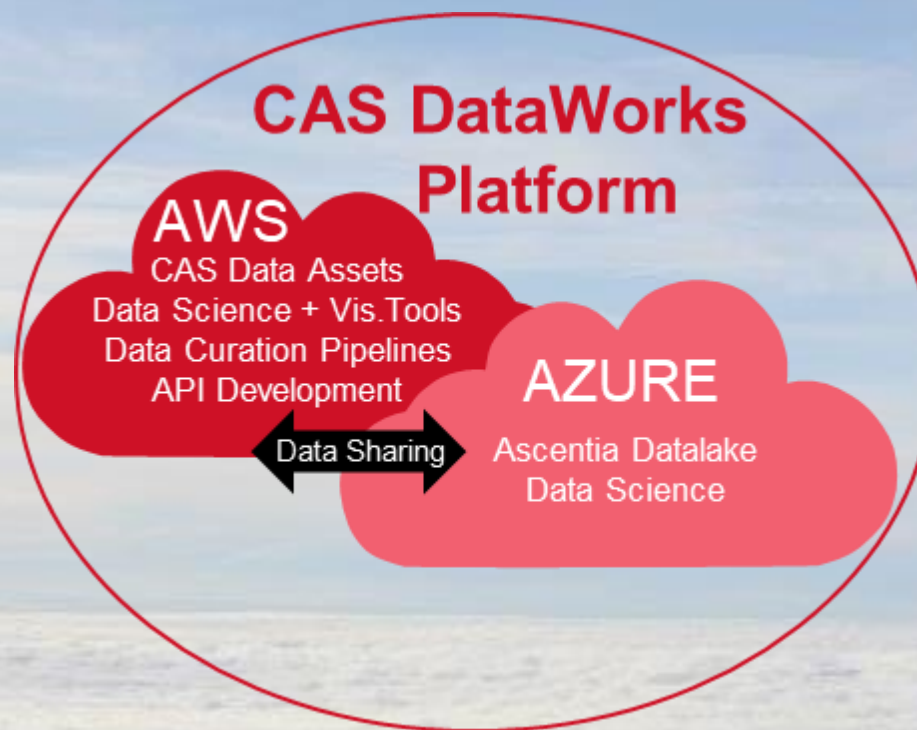

# Where We Are Headed

Continue adoption of platform solutions to reach new heights

## Multi-cloud Interoperability

- Data Sharing Across the Organization
- Increase opportunity for data science and analytics
- Promote Growth of Data Citizens

# Where We Are Headed

Continue adoption of platform solutions to reach new heights

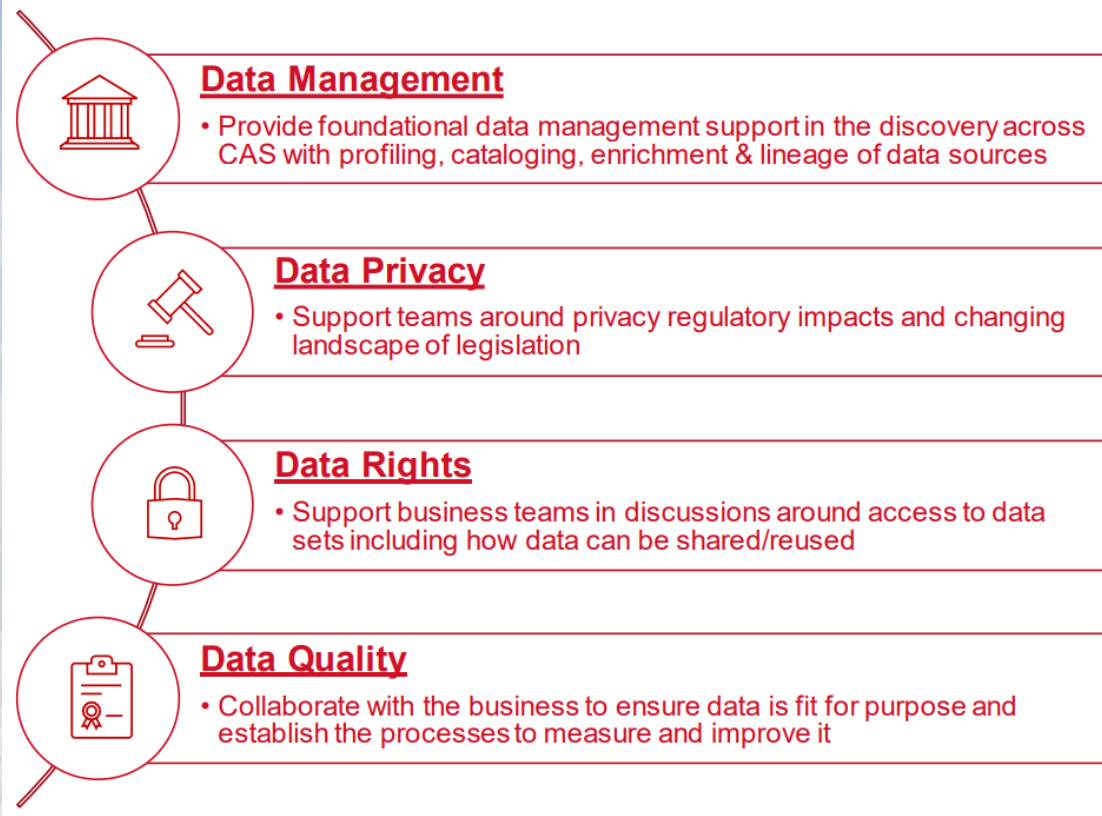

Unity Catalog

## CAS Data Governance

How does Governance bring value to the business and Collins?

**Establish compliant, trusted, and quality data throughout the data ecosystem**

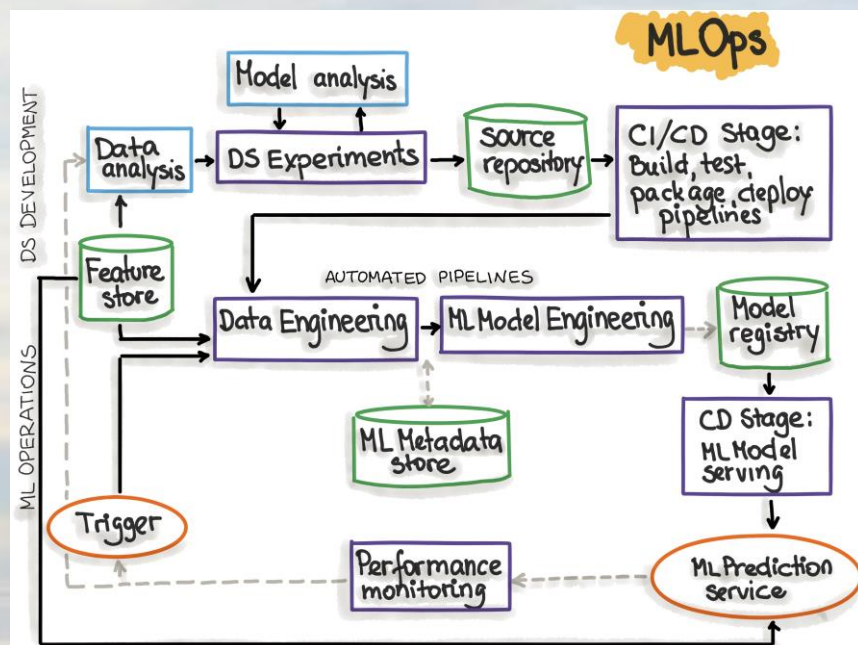

# Where We Are Headed

Continue adoption of platform solutions to reach new heights

<https://ml-ops.org/content/mlops-principles>

## Implement MLOps

Level 0

Everything is Manual!

Level 1

Automate the Model Development and Deployment

Level 2

Automate the Monitoring and Updating with Reinforcement Learning

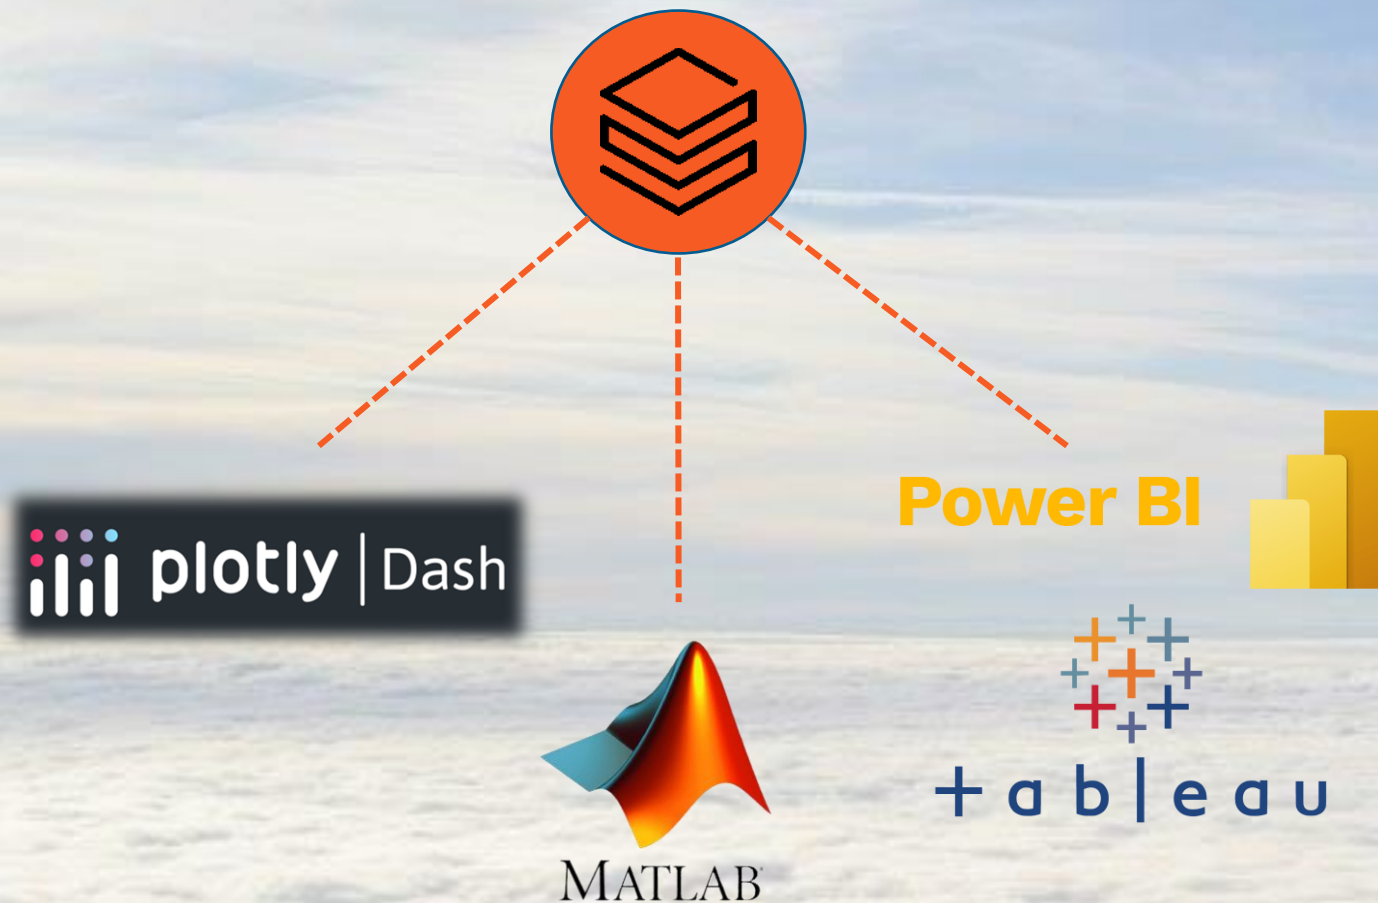

# Where We Are **Headed**

Continue adoption of platform solutions to reach new heights

Partner Connect

## 3<sup>rd</sup> Party Connectivity

- Leveraging the **Databricks Python SQL Connector, DBSQL, Serverless SQL Cluster**

Enables

- Dashboards (Tableau, PowerBI)
- Engineering analysis tools (Matlab)
- **Delivery *production* data apps (Plotly Dash)**

# Where We Are Headed

*More  
Sustainable*

*More  
Efficient*

*More  
Reliable*

*More  
Enjoyable*

## Transforming Data into Value

**Thank you**
