How Informatica Adds Value On Databricks

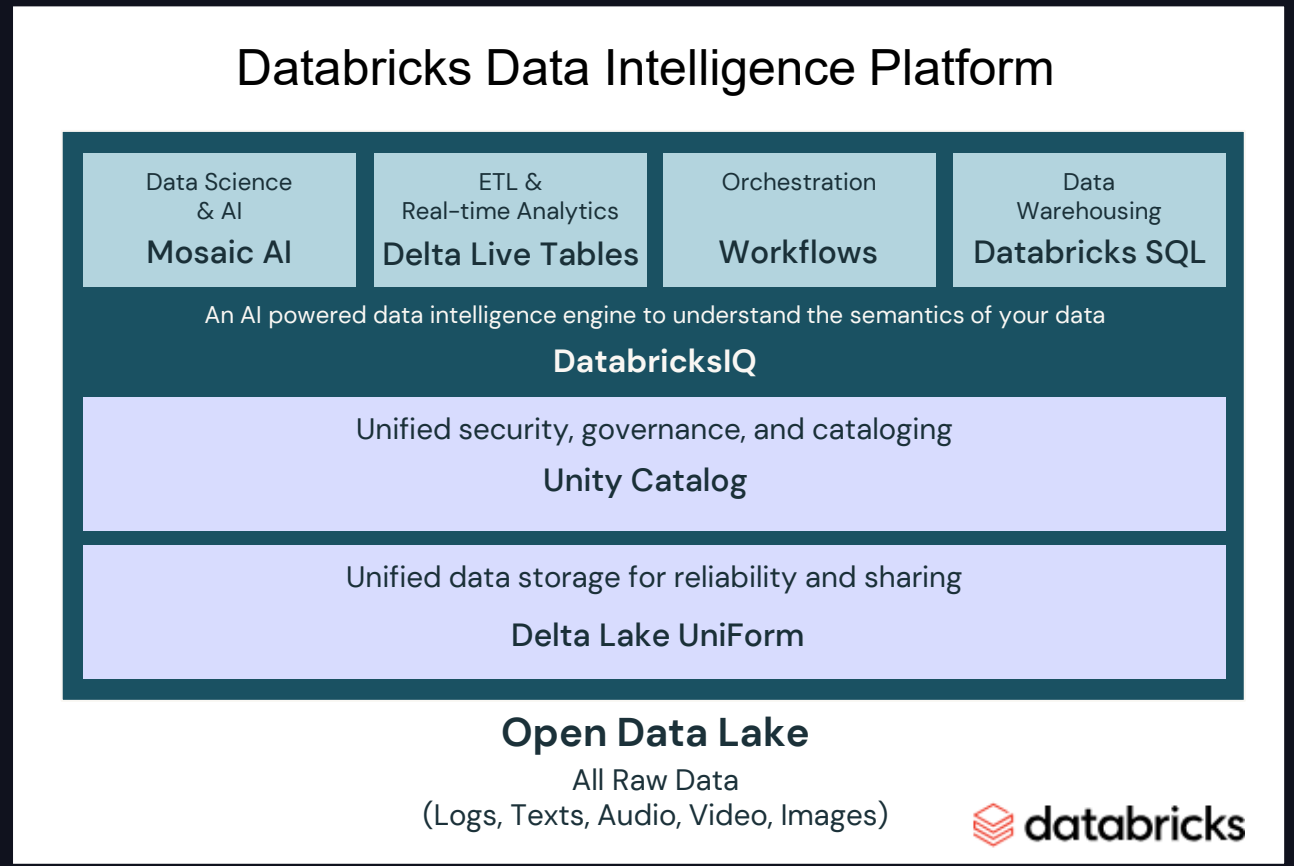

Informatica Solves Critical Data Challenges for Databricks Customers

Informatica Integrates with Databricks

Informatica
 Intelligent Data Management Cloud

Product Integration Roadmap

Informatica + Databricks – Integration Roadmap

Now Available on Partner Connect

Generally Available for Customers

Cloud Data Governance & Catalog

- Support for Scanning Unity Catalog data assets
- Integrated with Unity Catalog API
- Integrated with Partner connect (Announcing Today)

Cloud Data Marketplace

- Integrated Shopping cart experience for Databricks assets to Federated users
- Support for Databricks SQL endpoint for Copy into
- Support for Delta Lake & SQL Unity Catalog as endpoint

Upcoming Features

- AI Governance Scanning for Catalog
- Databricks Volumes support
- Databricks Vector Index Scanning
- Databricks Delta share support

Data Governance – The Baseline View

A Focus on Risk and Compliance

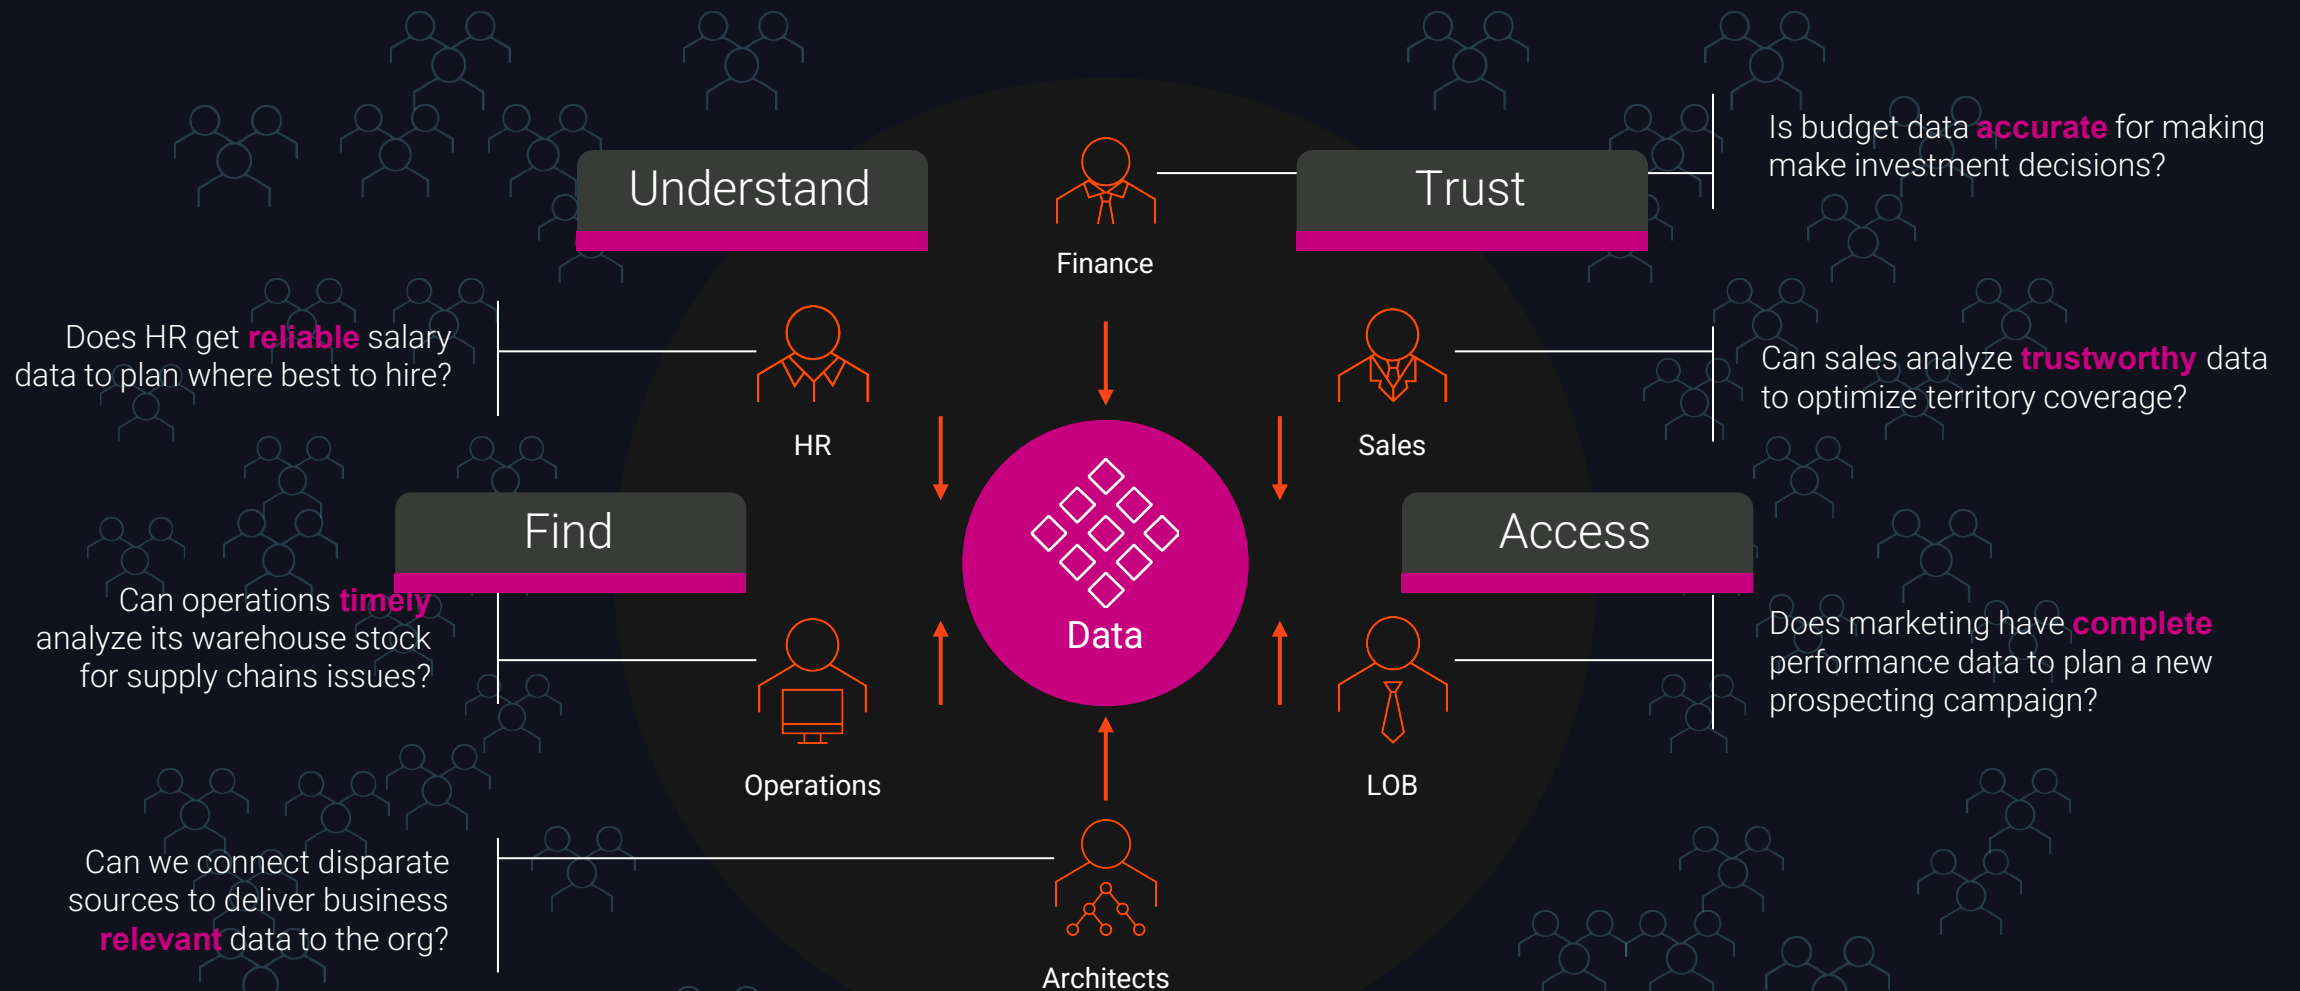

Governance for Risk and Compliance

Making data safe with auditing and reporting for transparency

Manage risk and comply with regulatory mandates and policies

Requirements for Data Democratization

Data Analytics **Governance With Data Sharing**

Ensuring data availability, reliability and governance

**Risk &
Compliance**

Manage risk and comply with
regulatory mandates and policies

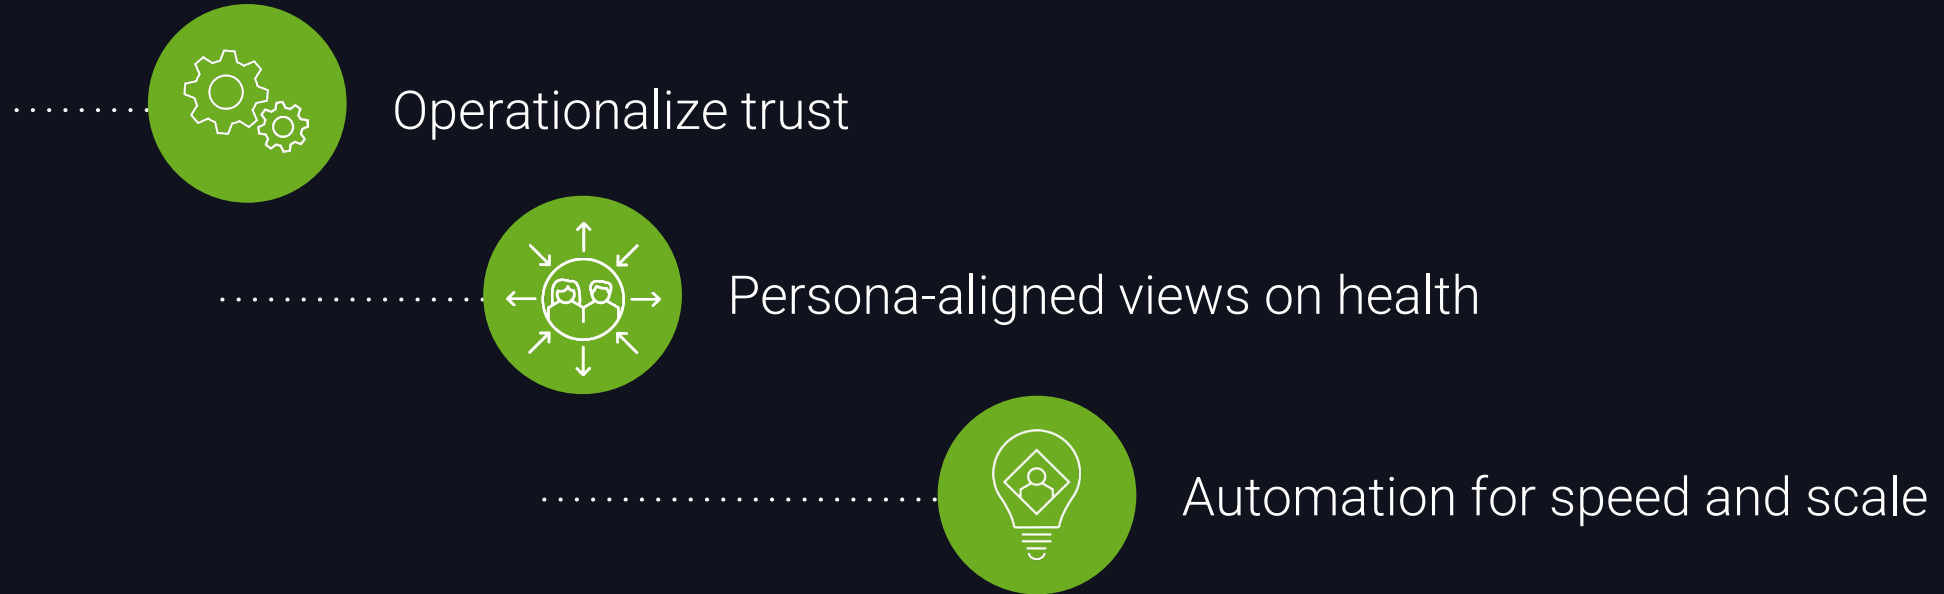

**Analytics &
Data Sharing**

Open data for business with
actionable insights and automation

What's next to Modernize Data Governance?

Automate Modern Data Governance needs at Scale

Manage and scale high-quality data pipelines for Analytics & AI

The Need for an **Operational View** on Trust

Monitor how data is consumed, protected and compliant with policies and regulations

Provide visibility into data health — identify impact of any issue for preventative or remedial action

Optimize availability, performance and capacity — cost-effectively and efficiently — on any platform

Modern Data Governance

Ensure Data Availability, Reliability & Governance

Risk & Compliance

Manage risk and comply with regulatory mandates and policies

Analytics & Data Sharing

Open data for business with actionable insights and automation

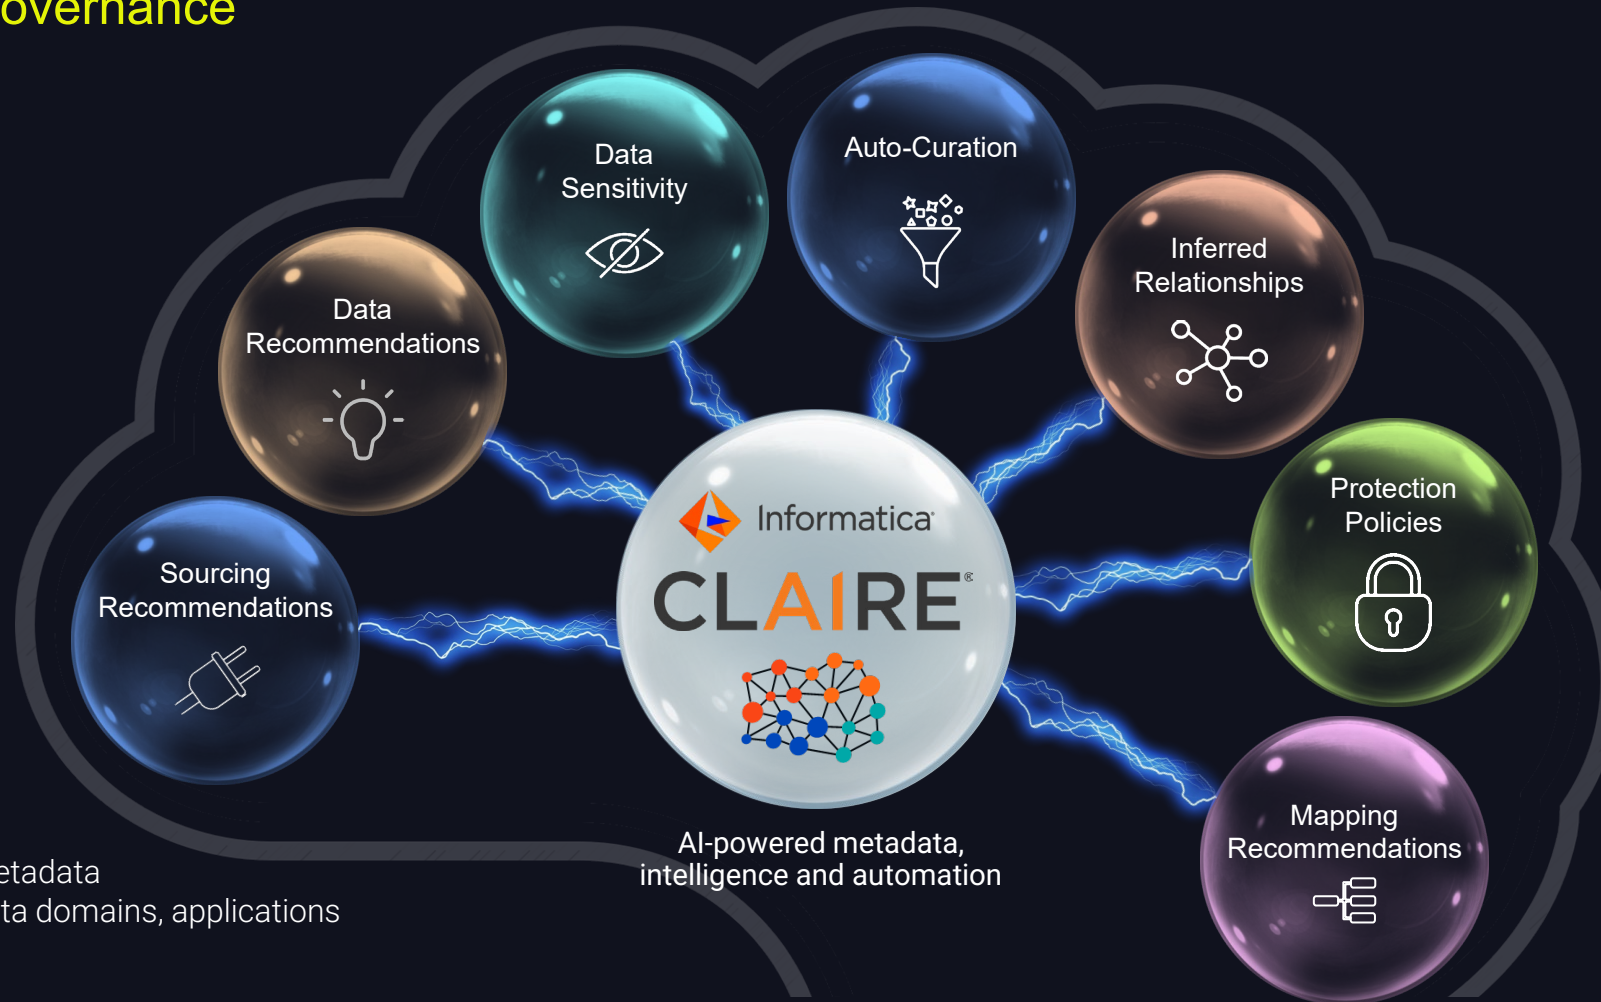

Intelligent Data Observability

Optimize availability, performance, capacity — cost-effectively and efficiently

CLAIRE[®] AI is the Brainpower Behind

Modern Data Governance

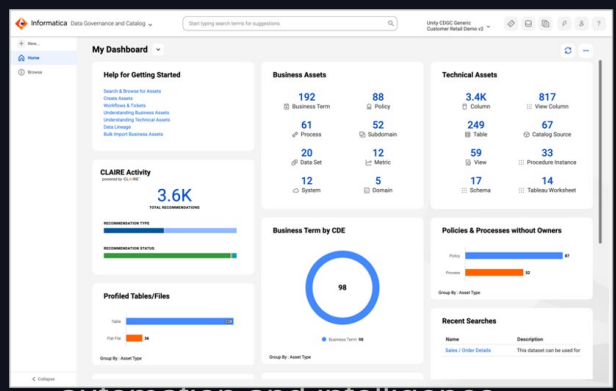

40 petabytes of active metadata
Organization, industry, data domains, applications

Data Governance and Catalog

Understand and Govern

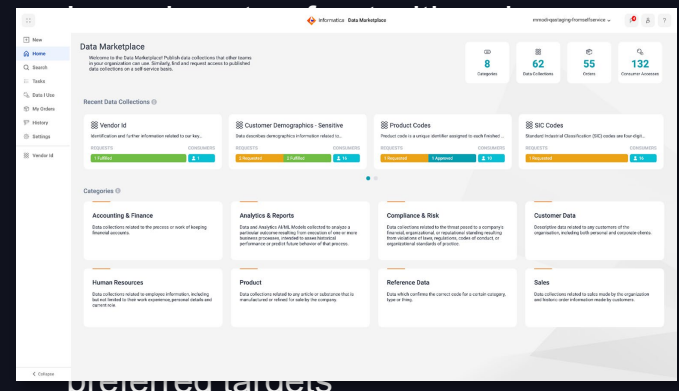

automation and intelligence

Data Marketplace

Share and Democratize

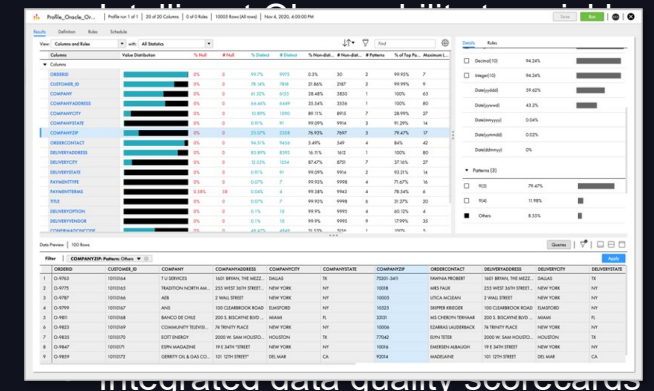

- Track fulfillment with full visibility

Data Quality and Observability

Cleanse and Trust

integrated data quality scorecards for trust-based governance

Demo

Empowering all Data Consumers & Data Owners

Automate Modern Data Governance at Scale

Governance

Simplify trusted data delivery with a unified set of cloud-native services to scale on demand, as needed

Democratization

Accelerate time to value for data-driven outcomes, connecting data producers and consumers

Observability

Achieve reliable analytics insights by monitoring pipelines and improving data accuracy
